In our preparation for the AP Examination, we will be delving into two different textbooks. In the manner in which we will use them, their offering of contracting approaches to the material actually serves to complement one another.

The textbook – Government in America – People, Politics and Policy – is an Advanced Placement edition projecting an overview of the material most likely to be found on the exam. Daniel Rubin’s book – How Our Government Really Works, Despite What They Say – offers both review and relevant editorial commentary tied to the application of the material beyond its theoretical context and grounds it in reality.

Please pay attention to the due dates for each chapter outline, noted below. Do not put this off by procrastination. I suggest you plan ahead, and proactively try to get ahead in the chapters when your schedule allows for it.

Here is what you are to do:
For the assigned reading each week, FIRST read the textbook, pulling out certain information (vocabulary, terms, processes, Supreme Court cases, etc) as detailed in the pages which follow and include them in your notes, which will be tuned in weekly. THEN read Rubin’s book. You will not be writing down anything from his book, but he will delve into similar material as that which the textbook covered and will give it more of an applicable, real-world flavor.

Due dates are Tuesdays. If there is no school on a given Tuesday, turn it in the first school day following it.

Government in America – People, Politics and Policy
By George Edwards III, Martin Watterberg and Robert Lineberry
© by Pearson Education, Inc isbn nr.0-321-29236-7

**Book:**
How Our Government Really Works, Despite What They Say
By Daniel Rubin
© Bardolf & Company isbn nr.978-0-9836184-9-2

The first few chapters were distributed to students for summer use only, so that we are not sending home the school-purchased textbooks during this time. In accordance with copyright requirements the school does own textbooks, which will be distributed when the academic year begins, at which point students will be expected to return the summer handout packets.
As you read the chapters from your textbook, American Government – People, Politics and Policy, make sure your notes contain the information emphasized in certain terms, concepts, statistics or peoples noted below. You will not be outlining your entire textbook. Rather, you will be extracting certain important information and include them in your notes. You will be expected to understand the relevance of the following ideas/concepts/statistics/peoples/terms and their place in both the progression of American history (when applicable) and in the mechanisms of American government. Of course, anything else in your textbook you find interesting may be included too, even if it is not on the accompanying list.

I do not believe in “busywork” – the inclusion of peoples/terms/statistics/concepts on this list is because they will be receiving at most only limited attention in the classroom lectures. Not included on this list are things which will be comprehensively focused upon in the lectures. This way, between the lectures and textbook, you will gain a thorough holistic grasp of American Government and the political processes.

As you organize your binder, please set aside a section for only textbook notes; don’t mix them up with your lecture notes.

You will not be outlining your entire textbook. Rather, you will be extracting certain important information and include them in your notes. You will be expected to understand the relevance of the following ideas/concepts/statistics/peoples/terms and their place in both the progression of American history (when applicable) and in the mechanisms of American government. Of course, anything else in your textbook you find interesting may be included too, even if it is not on the accompanying list. I do not believe in “busywork” – the inclusion of peoples/terms/statistics/concepts on this list is because they will be receiving at most only limited attention in the classroom lectures. Not included on this list are things which will be comprehensively focused upon in the lectures. This way, between the lectures and textbook, you will gain a thorough holistic grasp of American Government and the political processes.

As you organize your binder, please set aside a section for only textbook notes; don’t mix them up with your lecture notes.
